

Loglig – general (2)

- Please use @messages for titles so we could easily make translations later.
 - Add to DB table all new fields if needed
 - For all sections
1. Spectator
 - 1.1 create new JobRole "Spectator" RoleId=10
 - 1.2 will be possible to assign user to this role on Union and Club level
 - 1.3 on schedule/list and chronological list under league/tournament and section/list
 - add column assign spectator with multiple selects. (next to referee column)
 2. Referee
 - 2.1 on multiple selection of referee's dropdown (game schedule) change as follow:
 - 2.1.1 first select checkbox will add text "Main" next to the referee
 - 2.1.2 second select checkbox will add text "Second" next to the referee and so on for next selects
 - 2.2 in GameCycle/Edit view (edit game screen) – need to implement also the multiple referee selection + add spectator selection as well.
 - 2.3 On Union/Edit – League tab (Unions_Leagues) :
 - need to fix bug on "export Referees Report" - has appear after making the multiple selection possible
 - 2.4 show only current season games on "export referees report"
 - 2.5 make sure to show all referee selections on game schedule on excel report. The referee will be showed under columns: "Main", "Second", Third"... and add also spectator to this report
 3. Clubs/Edit

Require both to club under section and under union

 - 3.1 add tab "Notification" – as exist already on union, league, and team level.
 - 3.2 Sending a message will send it to all users related to this club (players/ officials) in the mobile app (update api if necessary)
 - 3.3 Bug with "club manager"
 - could not create tournaments for his clubs and can't get into teams under tournament
 4. General:
 - 4.1 Bug: Make sure that when creating schedule for the stage, first cycle start date is always taken from "Cycle start Date" field,

and this value is saved to DB.

the bug appears on the "group" tab when creating the 2nd stage and define on "game settings" the date/time of first cycle. after creating the schedule, the date is not accordingly to the game settings that has been defined

- 4.2 Make sure that Division games in League Standing are always ordered (ranked) accordingly to the next rules:

When teams have the same points – check if they already played against each other.

If played then the team that won should be ranked higher (even if the other team has better total goal/basket ratio difference).

If there is a draw between them than check for total goal/ratio difference and the better team in that case will be ranked higher.

All this rules should be applied to **Basketball and Waterpolo standings only**. Order of Netball and Volleyball standings should be left unchanged.

- 4.3 Bug – IsHandicapped: not showing the relevant data when the feature is enabled. Check on Union=31 (Basketball section). Should see on players page (Players/Edit) the fields @if IsHandicapped enable
- 4.4 Bug – when creating a new League/Tournament – on dialog window – don't show "Maximum handicap score value" if IsHandicapped feature is not enable for that Union.
- 4.5 Bug- on league schedule (Schedule_List/ ChronologicalList/ and Sections_List) – click on "swap" and changing stage date/time the page jump to top. Need to remain on current view.
